

Maersk H₂S Safety Services Italia srl

Provider of HSE
and H₂S Safety Services

MAERSK
H₂S SAFETY SERVICES

Provider of HSE and H₂S Safety Services

Maersk H₂S Safety Services Italia srl benefits from more than 15 years' local experience and is a qualified and competent provider of H₂S safety and HSE consultancy services. As the head office in Denmark runs additional operating bases in Australia, Brazil, Brunei and Norway, our presence is truly global. Our trademark is synonymous with first-class service, first-class equipment and first-class personnel.

FIRST-CLASS SERVICE

Service is one of our key values and manifests itself in the due consideration taken to the particular circumstances of each and every job. From the moment we are approached, we ensure that the services provided are tailor-made for the special requirements.

FIRST-CLASS EQUIPMENT

All our equipment is top range and our maintenance program ensures that all service and inspections are carried in full compliance with all relevant standards. We are certified by our equipment suppliers to carry out inspection and maintenance of the entire product range.

FIRST-CLASS PERSONNEL

First class personnel are a vital precondition in conducting a safe and efficient operation. Through determined efforts, we have taken a lead as the preferred safety contractor in the oil and gas industry and one of the key elements in gaining this lead is our highly skilled supervisors.

Our Safety Services

H₂S SAFETY SERVICES

The provision of H₂S safety services typically includes:

- rental of protection and detection equipment
- supervisory personnel qualified to prepare and maintain an H₂S contingency plan
- H₂S safety briefing and awareness
- preparation of safety documentation, including contingency plan and procedures
- equipment maintenance and service
- training and courses onshore as well as offshore

EDUCATION AND TRAINING

We run courses within H₂S safety and confined space entry, designed to meet industry standards. Our expertise and know-how within the field of H₂S contingency services enable us to offer high grade courses taking place in class rooms and 20' containers, simulating realistic situations in tanks and wells.

HSE SERVICES

The pool of safety personnel in Italy comprises H₂S Safety Supervisors, Confined Space Supervisors and HSE Consultants trained and experienced in performing consultancy services within safety, environment and quality. Our HSE Consultants are experts in process optimization, ensuring emergency preparedness and the highest level of onsite safety.

SAFETY MANAGEMENT SYSTEMS

We offer complete access control, using a specially developed program to effectively manage personnel leaving or entering the work area. To control all phases of the work taking place in hazardous environments, we use our special designed software guaranteeing an effective coordination of permits to work on-site.

CONFINED SPACE SUPERVISION

We inspect, monitor and rescue. When entering a confined space one enters a potentially hazardous environment.

Our Confined Space Supervisors are qualified in controlling confined space hazards through careful inspections of the space. Using our specialized detection and protection equipment our supervisors will certify the environment as radioactive material- and gas free.

ADR CONSULTANCY SERVICES

We advise on safe transport and offer complete support to companies dealing with loading, unloading and transport of dangerous goods, following a global ADR program developed to ensure a safe and precise loading of crude oil. Our safety personnel are qualified in monitoring compliance with governing dangerous goods requirements, as well as producing a range of data reports.

SAFETY EQUIPMENT

Our equipment packages are tailored to the specific requirements of our client. As a provider of gas detection and breathing air systems, our equipment is a lifesaving measure on-board an oil and gas installation.
